## Foreign Nameplate Shocks & Struts

OESpectrum **MONROE**

Tenneco Inc. has introduced an extensive line of advanced-technology replacement shocks and struts engineered specifically for foreign nameplate vehicles.

Monroe OESpectrum units are designed to provide handling precision and control while filtering out the ride harshness commonly encountered on many foreign-nameplate applications. This unique blend of control and comfort is made possible through an exclusive internal damping control technology first developed for leading global vehicle manufacturers. Visit the APC web site for more information.
